

# All Breed Clipart

## · GUIDE ·

Welcome to the clipart collection *DoberArt!* In this simple manual we have all the current clips in the CD-ROM illustrated in their respective group or folder. All of the artwork is copyrighted to AHEAD and any resale use is prohibited without permission.

*DoberArt* is a unique collection of ready-made graphics for computer use. You no longer have to be an artist to add well-drawn illustrations of your favorite dogs to any of your documents!

There are over 500 clips total in the current version which are available in the .TIF format and can be used in many of today's popular software applications easily such as MS Works, MSWord, MS Publisher, WordPerfect, PrintShopDeluxe and most all paint and publish programs and card and calendar ones as well!

The possibilities are as endless as your imagination!

Projects like personalizing your own letterhead or pedigrees, to advertising, newsletters, cards and labels - even Kennel Club use in catalog, you will find the breed representation is accurate and one of a kind. You can even use our clips to add splash to your own web pages!

The over 500 clip collection does offer all AKC breeds, including the newest to the oldest breeds. We also include some non-AKC breeds as well. There are both Agility and Obedience folders included with special greyscale and color folders too.

**NEW!** We now are offering the folders with CATS and HORSE clips!

All of the clips are copyrighted to AHEAD Graphics. The owner of the disc may use the clips in personal and business use - as long as there is NO resale of the art or any parts of the collection.

Usage in digitizing for embroidery is strictly prohibited. Web usage is allowed with a reciprocal link back to

[www.aheadgraphics.com](http://www.aheadgraphics.com)

if the art is used. For questions regarding resale use, please contact us @

## TIPS FOR USING THE CLIPART:

-  Start (run) your graphic or publishing program in which you plan to **IMPORT** the graphics into.
-  Insert your CD of Clipart.
-  Look for keywords such as "import", "get picture" or "place".
-  Double-click on the folder marked - **DOBERART**.
-  All sub-folders will now be listed - choose which group you wish to import from.
-  Double-click on the group you chose, scroll down until you find the filename you wish to use.
-  Highlight (click) the file you want to use. Now click on "OK".

**That's it!**  
Simple and easy to use.

You can also copy clips that you use regularly to your hard drive to save time.

All the clips are listed in the next pages by filename under their respective group folder.
